What is Peer Support?

Peer support begins and ends with the individual. We look at the “whole” person, not just one aspect, such as an addiction or Mental Health issue. By understanding and respecting each individual’s worldview, establishing a connection, meeting them where they are on their terms and encouraging them to move towards accomplishing goals, we empower each other to practice self-directed care and ultimately, achieve the life desired. The foundation of Peer Support is shared lived experiences. Peer support Specialists are those who are currently or have in the past lived with a mental health and/or addiction/substance use issue. This gives them the best starting point from which to offer support, their own life experience. Only those who have been through something in life can fully understand what that experience is like. We understand that we don’t have all the answers! We are on this road of recovery, just the same as everyone else. We are not “above you” or in “authority over you”. No one knows what you need at any given moment, better than you. We can however, come beside you to listen, support, and offer resources that can help you on your individual journey.
